

Jacobi, Toombs & Lanz

Engineering Technician

JTL has a career opportunity available for an individual who is interested in furthering themselves through on the job training, hard work and dedication. We are currently seeking to hire a technology driven, construction minded individual as a Civil Engineering Technician. Civil Engineering Technicians with JTL will have the opportunity to learn AutoCAD Civil 3D, Carlson Software, high-tech land surveying equipment, drone technologies, as well as learn to use construction testing equipment. Previous experience with, or basic understanding of, water and wastewater treatment and collection systems is preferred. JTL is seeking an employee to be trained in all of these fields to provide both flexibility and diversity for the employee and company.

Engineering and surveying tasks typically include the following:

- Develop engineering design projects and construction plan documents using AutoCAD software.
- Work with Professional Engineers and Land Surveyors to identify and address engineering problems and solutions.
- Provide both office and field support for land surveying and engineering data collection projects utilizing the latest technology and software, such as robotic total stations and drone technologies.
- Work with engineering staff to provide on-site construction administration and observation support for construction projects.

Engineering and surveying technicians work under the direction of licensed professionals and will have the opportunity to learn on the job and grow their career through a diverse range of projects and opportunities.

Compensation & Benefits:

Experience with AutoCAD or MicroStation software is strongly preferred; however, the willingness to learn new software programs and technology is all that is necessary. General knowledge of land surveying and/or construction experience is a plus, but not necessary. Courses at a technical or vocational school encouraged. Structured on the job training will be provided to allow the employee the opportunity to work in engineering design, land surveying and construction observation.

Education, Training & Experience:

JTL offers a competitive compensation and benefits package which includes employee healthcare, dental, vision, life insurance, 401k, vacation, performance-based bonuses and other items. Pay is based on experience.

About Jacobi, Toombs and Lanz:

Jacobi, Toombs and Lanz, Inc., Consulting Engineers and Land Surveyors is a Civil Engineering firm with over 60 years of experience. We have a proven record in the planning, design, and construction supervision of diversified projects, covering the full range of municipal infrastructure.

The firm was established in 1955 as a sole proprietorship, and today, as a private corporation, has offices in Indiana and Kentucky with a staff of nearly 50 employees. Our clients include Federal, State and local agencies, developers, utility companies, and private firms.

Jacobi, Toombs & Lanz, Inc. is an equal opportunity employer and we do not discriminate on the basis of race, color, religion, sex or national origin.
